

# Digital Flow Transmitter

## for continuous flow measurement and batch control

Type 8025

DN 15 ... DN 400; PN6

### Design

The paddle-wheel flow transmitter for continuous flow measurement and batch control is specially designed for use in neutral and slightly aggressive, solid-free liquids.

The transmitter 8025 is a compact unit with integrated sensor or a remote mounted sensor 8020 with panel- or wall mounted transmitter. The transmitter produces a 4...20 mA standard signal proportional to the flow and provides a freely adjustable pulse output. Both signals can easily be transmitted and processed.

The display and menu-guided operating elements allow a customized adjustment of all measuring parameters:

- multi-language
- various engineering units
- customized measuring ranges
- teaching mode; simulation mode

A specially designed fitting system ensures simple installation of the devices into all pipes.

#### Flow Transmitter

- 4...20 mA standard output signal
- Pulse output (NPN, PNP or reed),
- Local flow display,
- 2 totalizers display,
- 2 programmable thresholds (option)

#### Flow Switch

- 2 programmable thresholds

#### Stand Alone (Battery)

- Battery powered,
- 2 totalizers display,
- Local flow display,

#### Batch Controller

- 2 totalizers display,
- 2 programmable thresholds
- 3 Dosing modes:
  - Local
  - External (via binary inputs)
  - Time proportional (via PLC)

### Advantages / Benefits

- Easy System integration by Easy LINK provides low cost of ownership
- Compact design
- Easy commissioning due to multi-language, menu-guided operation
- Volumetric flow measurement with two totalizers
- Standard options:
  - 2 Alarm relays
  - Pulse output on relay reed
  - Power supply 115/230 VAC
  - 9 VDC battery version
- Wetted parts of PVDF and ceramic with FPM/EPDM-gaskets
- Also available with remote sensor and panel and wall mounted transmitter

### Applications

#### Flow Measurement & Dosing Control

Liquids in food industry

Chemical industry (non hazardous applications)

Water treatment and process technology

Industrial waste water treatment

Auxiliary plants

Ideal system solutions for filling systems

# Digital Flow Transmitter

for continuous flow measurement and batch control

## Type 8025

### Design

The compact flow transmitter combines a flow sensor and an electronic board with display in an IP65 enclosure.

The sensor part consists of a transducer and an open-cell paddle-wheel.

The transmitter component converts the measured signal and displays the actual value. The output signals are provided via a 4-pole cable plug or via cable gland PG 13.5.

### Principle of operation

When liquid flows through the pipe, the paddle-wheel is set in rotation inducing a measuring frequency in the transducer, which is proportional to the flow.

The flow transmitter 8025 can receive an optional power supply 230/115 VAC and is also available with 9 VDC battery power supply.

The transmitter measures a flow rate from 0.3m/s (1 ft/s).

### Installation

The recommended In- and Outflow straight pipe length should respect 10xD in and 3xD out.

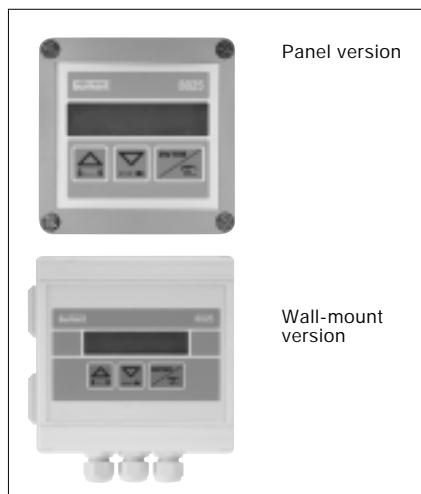

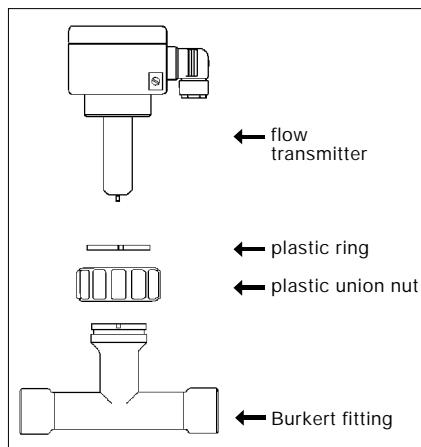

According to pipe's design, necessary distances can be bigger or use a flow conditioner to obtain the best accuracy.

For more informations, please refer to EN ISO 5167-1.

The flow transmitter can be installed in either horizontal or vertical pipes.

The suitable pipe size is selected using the diagram on the next page. Pressure and temperature ratings must be respected according to the selected fitting material (see next page).

The flow transmitter is not designed for gas flow measurement.

### Operation / Commissioning

The device can be calibrated by means of the K-factor, or via the Teach-In function.

Customized adjustments, such as measuring range, engineering units, pulse output and filter are carried out on site.

for continuous flow measurement and batch control

Type 8025

## Examples of fitting selection

The suitable pipe size is selected using the diagram below.

### Example 1:

Specification of nominal flow: 10 m<sup>3</sup>/h

Ideal flow velocity: 2...3 m/s

For these specifications, the diagram indicates a pipe size of DN 40.

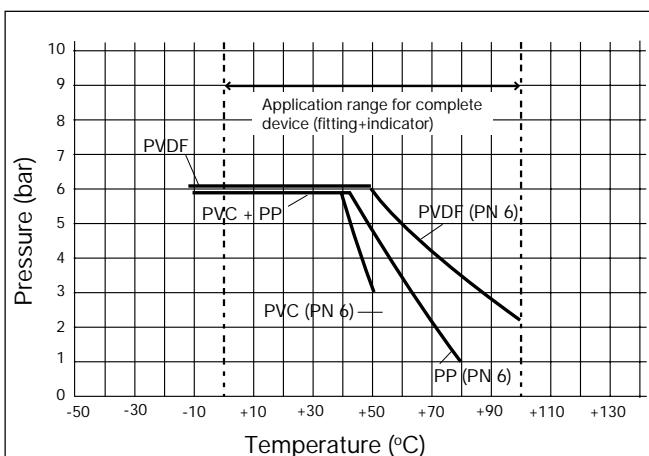

### Example 2:

Specification of nominal flow: 50 gpm

Ideal flow velocity: 8 fps

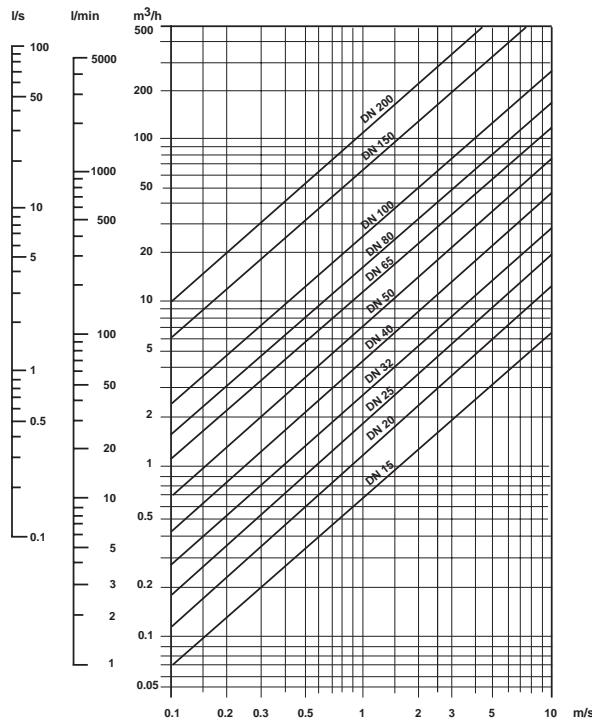

For these specifications, the diagram indicates a pipe size of 1 1/2".

for continuous flow measurement and batch control

## Operation and display

The operation is specified according to two or three levels:

### Flow Transmitter :

#### ► Indication in operating mode

- flow
- output current
- main totalizer
- daily totalizer and reset function

#### ► Parameter definition

- language
- engineering units
- K-factor / Teach-In function
- measuring range 4...20 mA
- pulse output
- relay (option)
- filter
- reset of main totalizer

#### ► Test

- alteration of basic adjustment (offset, span)
- frequency test of sensor
- flow simulation (dry-run test operation)

### Batch Controller :

#### ► Indication in operating mode

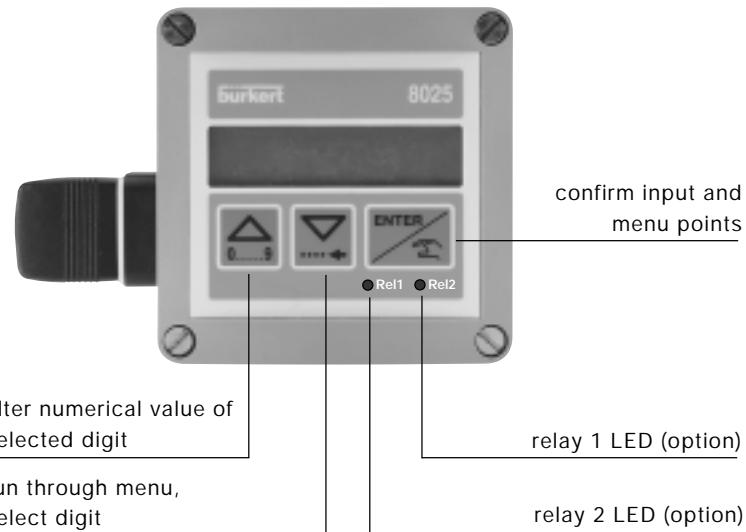

- main and daily totalizers and reset function
- dosing amount
- dosing mode
- flow

#### ► Parameter definition

- language
- engineering units
- K-factor / Teach-In function
- selection of batching mode
- over-run correction
- alarm
- function mode of relays
- reset of main totalizer

#### ► Test

- display of state of binary inputs
- relay test
- frequency test of sensor

## Flow Switch :

#### ► Indication in operating mode

- flow

#### ► Parameter definition

- language
- engineering units
- K-factor / Teach-In function
- relay
- filter

#### ► Test

- frequency test of sensor
- flow simulation (dry-run test operation)

## Stand Alone (Battery) :

#### ► Indication in operating mode

- main and daily totalizers with reset function
- flow

#### ► Parameter definition

- language
- engineering units
- K-factor / Teach-In function
- filter
- reset of main totalizer

### Specific data Flow Transmitter

Voltage supply 12...30 VDC

Option: 115/230 VAC power supply

Output signal 4...20 mA

### Load

max. 900 Ω at 30V

max. 500 Ω at 24V

max. 100 Ω at 15V

max. 800 Ω with power supply 115/230 VAC

### Pulse output

Open collector NPN and PNP, 0...30 V, 100 mA, protected

Option: relay Reed closing 0,1 sec., opening depending on flow rate 0,1 sec. min.

max. 34 V, 0,2 A

### Relay output (option)

2 relays, freely programmable, 3 A, 230 V

### Specific data Flow Switch

Voltage supply 12...30 VDC

Option: 115/230 VAC power supply

### Relay output

freely programmable, 3 A, 230 V

### Specific data Batch Controller

Voltage supply 12...30 VDC

Option: 115/230 VAC power supply

### Digital inputs

4 inputs, 5...30 VDC

### Digital output

1 input, Open collector NPN and PNP, 0...30 V, 100 mA, protected

### Relay output

2 relays, freely programmable, 3 A, 230 V

### Specific data Stand Alone (Battery)

Voltage supply 9 VDC battery supply

Autonomy 3...4 years with lithium batteries

1...2 years with standard batteries

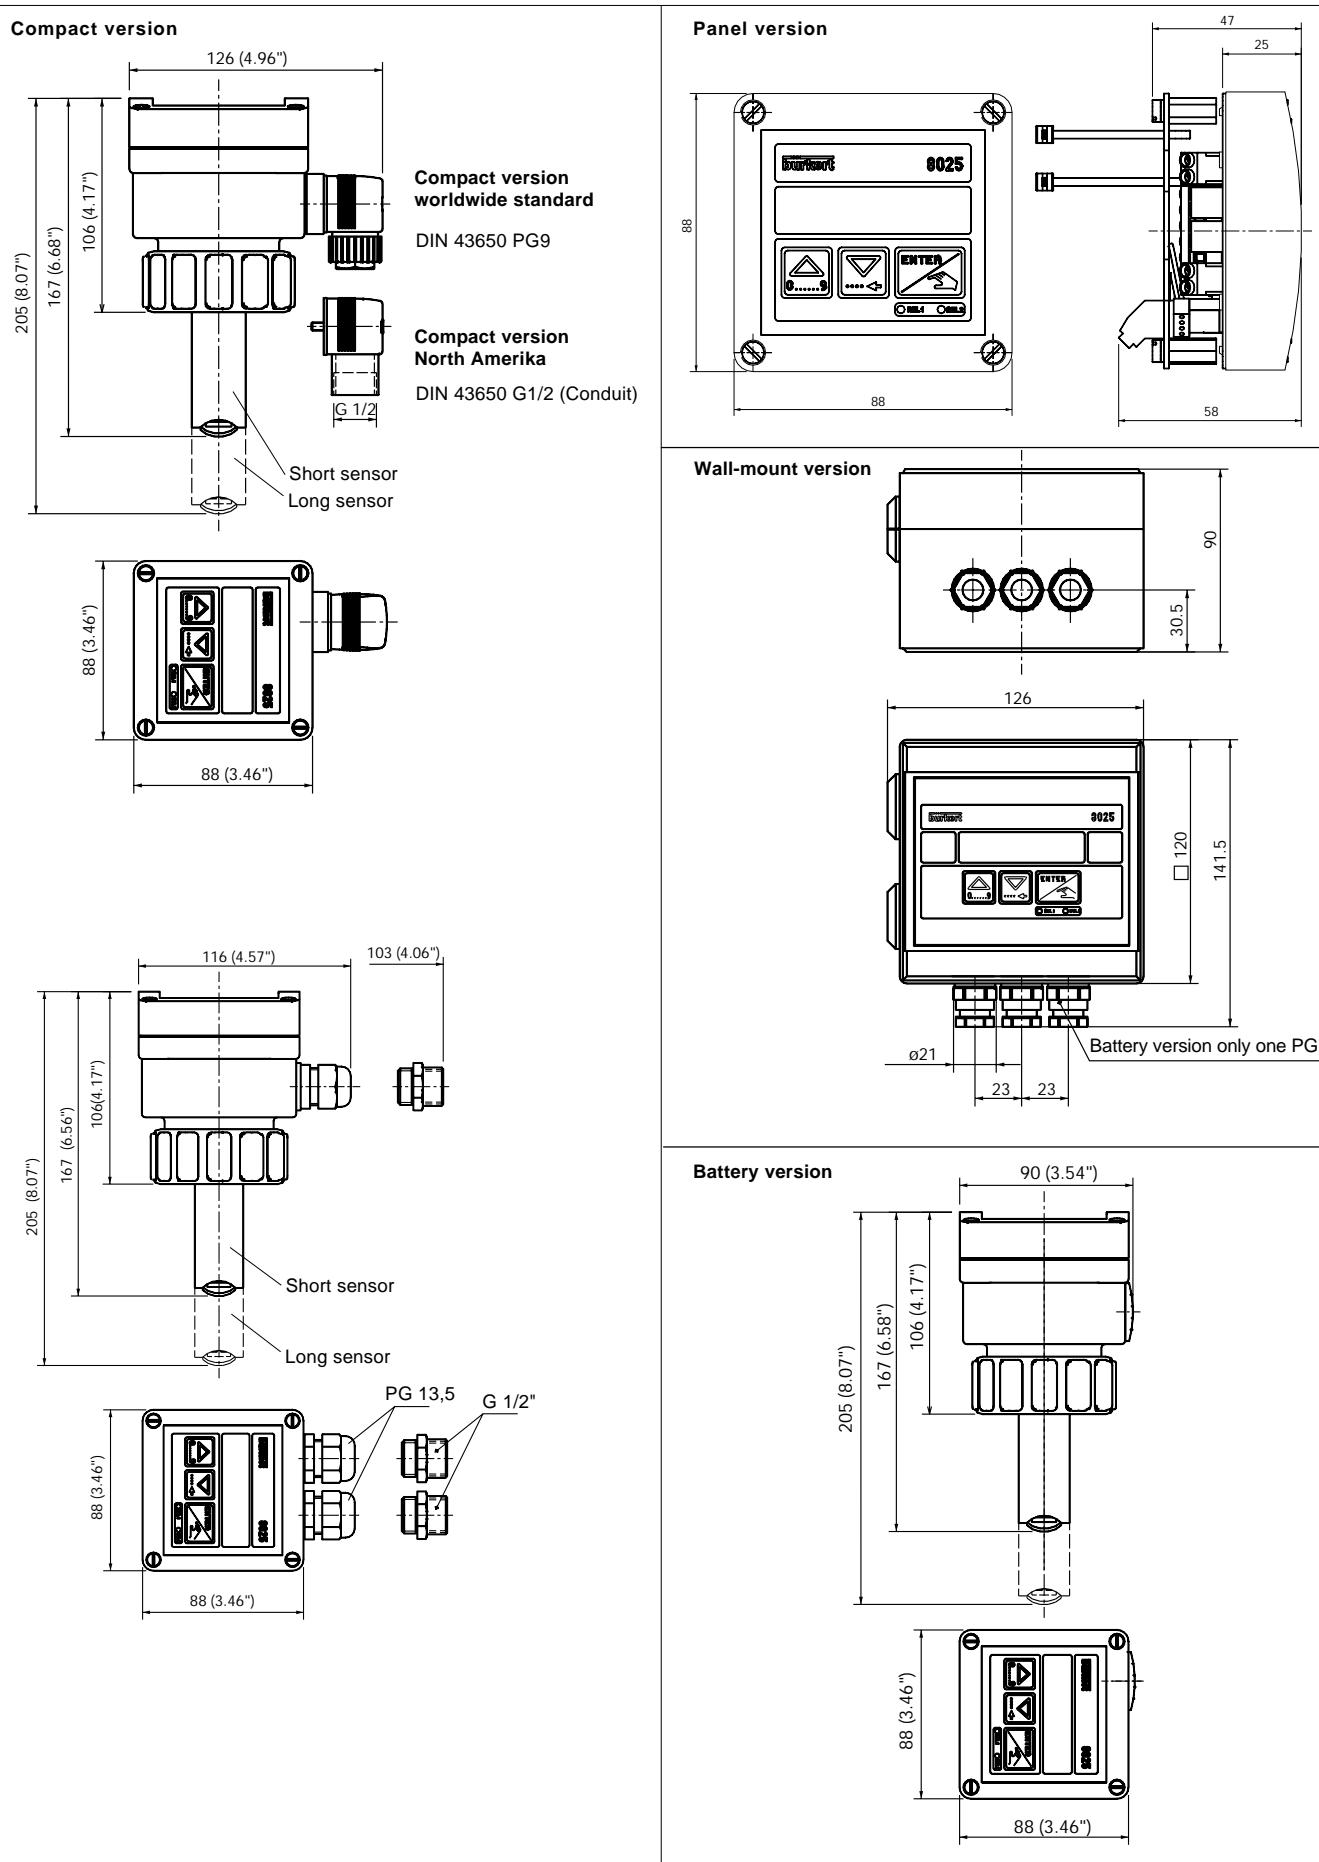

\* Under reference conditions, i.e. measuring fluid = water, ambient and water temperature = 20 °C, applying the minimum inlet and outlet pipe straights, matched inside pipe dimensions  
o.R. = of reading  
o.F.S. = of full scale (10 m/s)
