

## Overview

The SITRANS F US SONOFLO ultrasonic flowmeters type SONO 3000 CT are designed for accurate, high resolution flow measurement in water based district heating plants e.g. local networks, boiler stations or substations and in chilled water applications.

The combination of SONOFLO ultrasonic flowmeters type SONO and a SONO 3000 CT transmitter are designed and approved for custody transfer according to PTB, class C, OIML R75, class 4 and a lot of local country approvals.

The sensors are approved according to EU Directive 97/23/EC dated 29 May 1997 regarding fluid in group 1, classified in category III. Design EN 13480.

## Benefits

- No pressure drop
- Reliable and accurate flow measurements
- Long-term stability with excellent performance
- Can measure on all district water independent of water quality and conductivity
- Low cost of ownership
- Matched pair calibration of complete system
- Local country approvals
- Outputs: one analog, pulse/frequency and relay
- Self diagnostic

## Application

The main application for SONOFLO ultrasonic flowmeters type SONO 3300/3000 CT is to measure volume, on water at temperatures from 3 to 200 °C (37.4 to 392 °F) (depending on local approvals), in the following fields:

- District heating systems
- Chilled water systems
- Combined district heating- and chilled water systems

## Design

The SONO 3300/3000 CT flow meter consists of a flow sensor type SONO 3300 CT, transmitter SONO 3000 CT incl. remote mounting device and 4 pcs coaxial cables for connecting the flow sensor and the transmitter.

The flow sensor is a 2-track direct shot sensor type with flanges and in the sizes DN 50 to DN 1200 (2" to 48").

The transmitter can be chosen in 3 different versions, IP67, IP20 and IP65.

All versions are sealed for custody transfer.

## Integration

The flowmeter pulse output is often used as input for heat calculators. The range of meters enables optimum measurement of energy consumption.

The analog output is used to inform the SCADA system about the actual volume flow values in the distribution network.

## Technical specifications

### SITRANS F US SONOFLO SONO 3300 CT

#### Accuracy

Error in measurement at reference conditions; % of measured value

#### Dynamic range

- 1:20 Pulse output  $\leq \pm 0,5\%$
- 1:50 Pulse output  $\leq \pm 3\%$

#### Repeatability

$\leq \pm 0,25\%$

#### Input

Nominal size DN 50 ... DN 1200 (2" ... 48")

- PN 10 (DN 500 ... DN 1200 (20" ... 48"))
- PN 16 (DN 50 ... DN 1200 (2" ... 48"))
- PN 25 (DN 200 ... DN 1000 (8" ... 40"))
- PN 40 (DN 50 ... DN 100 (2" ... 4"))

#### Transducers

Integrated version welded into the pipe

#### Rated operating conditions

##### Ambient conditions

##### Ambient temperature

- Operating -10 ... +160°C (14 ... 320 °F) depending on approval

##### Storage

-40 ... +85°C (-40 ... +185 °F)

##### Degree of protection (enclosure)

Standard version IP67

##### Medium conditions

Liquid temperature -10 ... +200°C (14 ... 392 °F) depending on approval

##### Maximum flow velocity

10 m/s (32 ft/s)

#### Design

2-track sensor with flanges and integrated transducers

##### Material

- Pipe
  - DN 50 ... DN 150 (2" ... 6"): Steel GS-16 Mn5, mat. No. 1.1131
  - DN 200 ... DN 1200 (8" ... 48"): Steel EN 1.0345
- Flange
  - DN 50 ... DN 1200 (2" ... 48"): Steel EN 1.0025-S235JRG2
- Transducers
  - Stainless steel

#### Certificates and approvals

##### Material certificates

The sensor is supplied with a Siemens Certificate of Conformity. Material certificate on wetted parts on request

##### NDT examination report

Available on request

**SONOFLO SONO 3300/3000 Custody Transfer**

Transmitter SONO 3000 CT, IP67, wall mounting

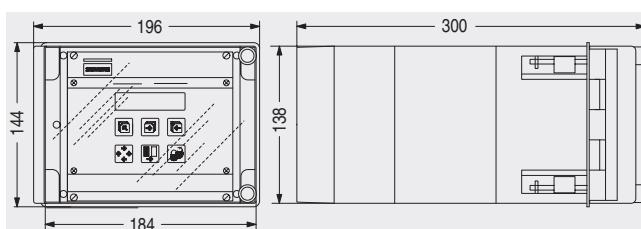

Add approximately 30 mm (1.18 inch) on each side for cabling, approx. 2 kg (4.4 lb).

Transmitter SONO 3000 CT, IP65, wall mounting

Weight 3.5 kg (7.72 lb)

Transmitter SONO 3000 CT, IP20, front of panel

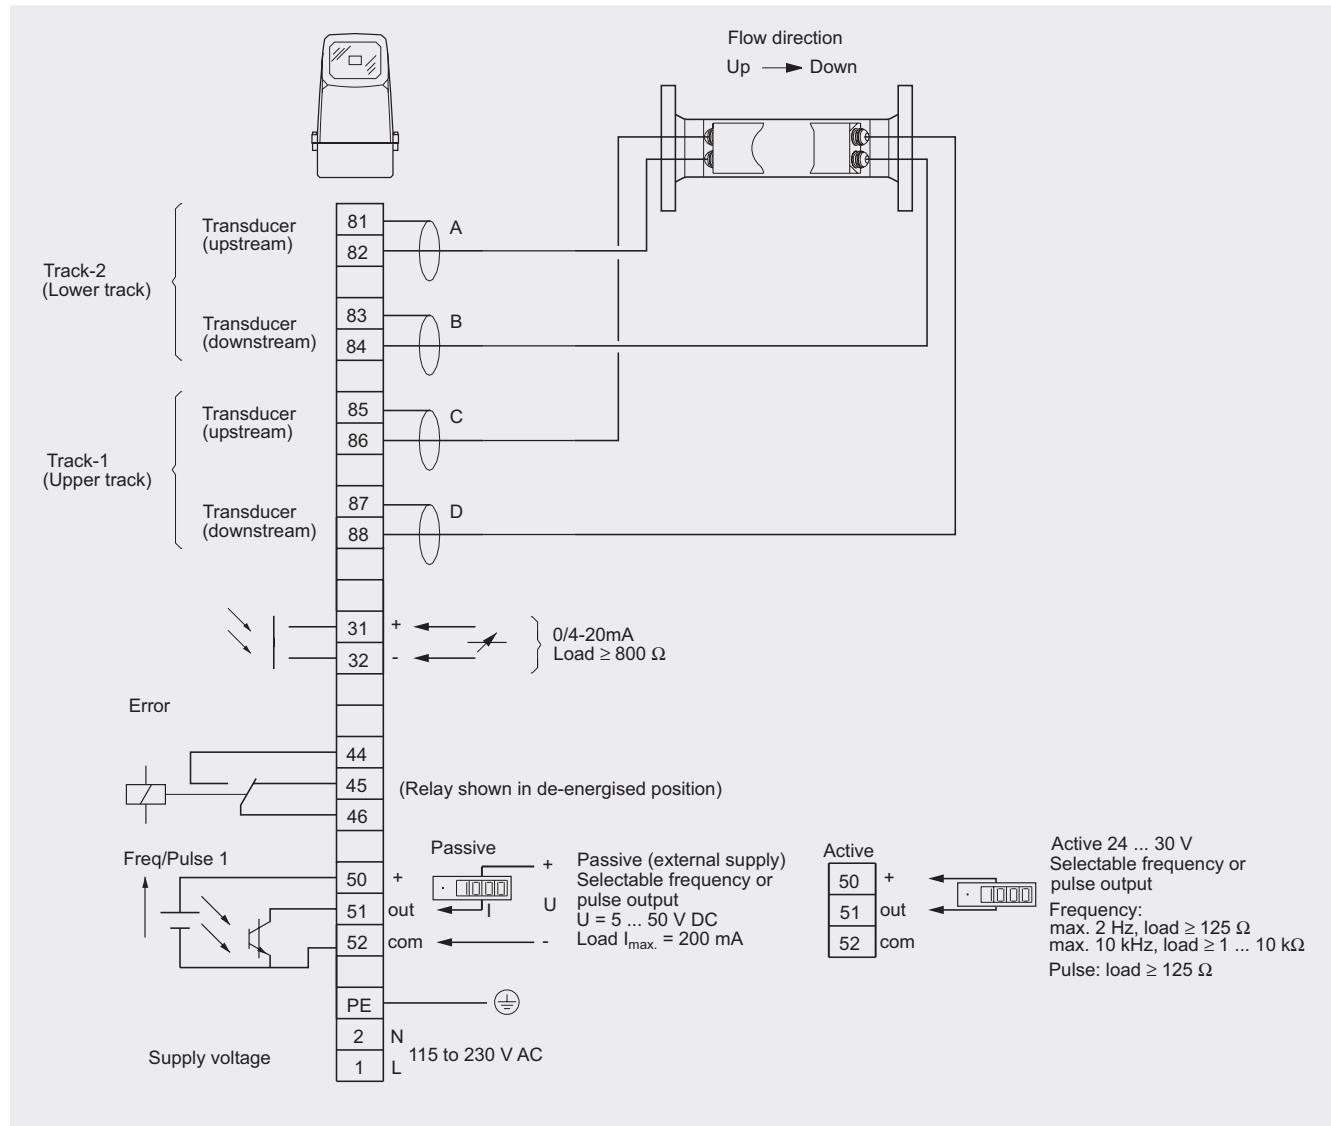

Weight 2.8 kg (6.17 lb)
